Results-driven Full Stack Web Developer specializing in backend development with Node.js. Proven ability to translate complex business requirements into scalable solutions. Adept at seamless integration of frontend and backend technologies for optimal user experiences. Passionate about staying ahead in technology to create innovative solutions that drive efficiency and elevate user satisfaction. Seeking a challenging role to leverage technical expertise and contribute to innovative projects.

Experience

Senior Associate(1 year) | Associate(1 year) - Technology (BNED LoudCloud)

Jan 2022 - Present

- Contributed significantly to both backend and frontend development for the FDC product during a two-year tenure. Demonstrated expertise in creating robust and scalable solutions using Node.js and other backend technologies, alongside Vue JS for the frontend.
- Collaborated closely with cross-functional teams to effectively translate complex business requirements into efficient and high-performance backend functionalities.
- Successfully implemented RESTful APIs, optimizing communication between frontend and backend systems, and ensuring a seamless flow of data for critical functionalities within the FDC product.
- Streamlined coding practices, resulting in a 15% reduction in project timelines and an overall improvement in development speed, while maintaining code quality.
- Played a vital role in the design and implementation of backend features, receiving consistent positive feedback from peers for code quality and clarity.
- Demonstrated a high level of adaptability by quickly learning and integrating new technologies into the development stack, contributing to the team's agility in responding to evolving project requirements.
- Earned a "Very Good" rating from management, underscoring a commitment to excellence and effective collaboration within the team.
- Recognized for outstanding contributions and earned a well-deserved promotion from Associate to Senior Associate within the first year of employment.

Education

Banaras Hindu University

2016

- Completed B.A (Hons) degree with Economics.

Altcampus

2021

- Completed Full stack web development course with MERN Stack.
- Worked on variety of Backend and frontend projects to learn various aspects of web development and get better understanding of Javascript.
- Participated and won a hackathon organized by Incubate-Ind along with GitHub-Ind.
